PROFILE

I am currently a student at Multimedia Nusantara University majoring in Computer Science. His last two years of study at UMN have deepened his skills in manufacturing IT products such as websites and applications. I am a student who never gives up, is resourceful, and has great enthusiasm for learning new things.

EXPERIENCES

Mentoring UMN 2022

(April 2022 - November 2022)

Member of Accommodation Division

UMN Mentoring Character Building is a compulsory annual activity for mentees (UMN freshmen) with the aim of in-depth introduction to UMN's 5C values. In this activity, mentees do educational activities accompanied by mentors (UMN students). A mentor prepares her to be an individual ready to implement her 5C values of UMN on and off campus. As a member of the Accommodation Division, I am responsible for ensuring that mentoring activities are safe, smooth, and hassle-free for all mentoring participants and other mentoring division, and I am responsible to provide assistance to all division that are requesting it.

3.80

Santu Petrus High School

(December 2017 - March 2020)

High School Specializing in Natural Science

PROJECTS

Sans Detendu Hotel Booking Website

(November 2021 - December 2022)

<https://hoteldetendusans.000webhostapp.com/>

This project is about a hotel facilities website that is created by using PHP programming language and MySQL database but it is implemented by CodeIgniter framework. My task in this project is focusing on the backend side of the website.

Si(p)Lapor Application

(October 2022 - December 2022)

https://play.google.com/store/apps/details?id=id.ac.umn.darren_hard_carry_uas_map

This project is to create an application that is useful for the occupants of a boarding house to instantly report a problem in a boarding house to the boarding house owner. This application is created using the Java programming language and Android Studio IDE. The app is capable of CRUD by using the Firebase online database. In this project, I focus my attention on the backend side such as CRUD.

Makan Santuy Food Website

(December 2021 - December 2021)

<https://peaceful-yalow-9b2487.netlify.app/>

This project is to create a Food database website by using React.js and integrating the public API into the website. My task in this project is integrating the API into the website so that the website is able to display the

data on the website.

Berita Nyantui News Portal

<https://beritanyantui.000webhostapp.com>

(September 2021 - October 2021)

In this project, I am creating a news portal website using PHP programming language and MYSQL database. In this project, I mainly focus my attention on the backend part and which is to integrate the MYSQL database into the website and create the input field so that the user is able to perform CRUD.
